

SOUND WAVES - MEDICINE OF THE FUTURE

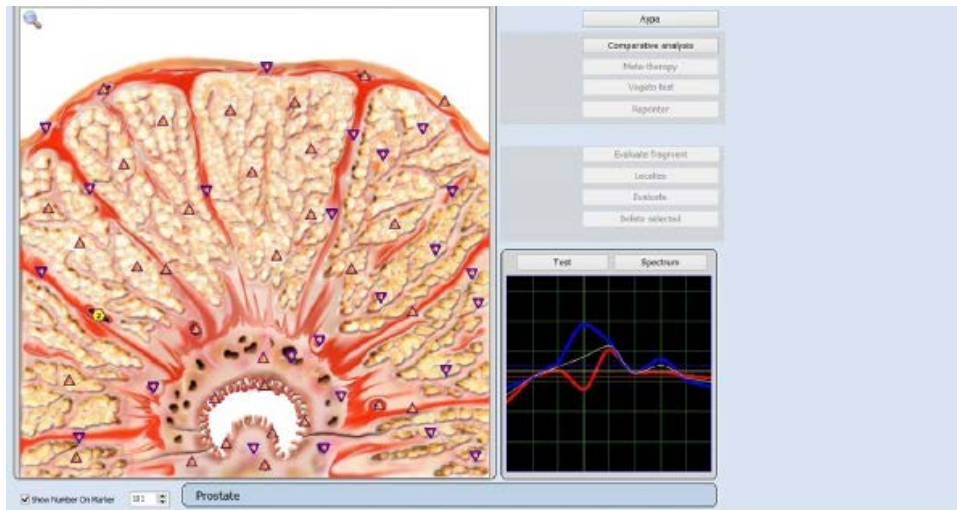

Charl de Villiers doing what he loves best

FREQUENCIES... Mysterious elements invisible to the eye, yet present in every object – human, animal, plant or rock; body organs, bacteria, viruses...indeed, every single thing that has been created! Technology can even let us hear the beautiful “songs” generated by the vibrations, or frequencies, of the planets and stars resonating throughout the universe!

Giant scientific strides since the mid-20th century have allowed mankind to exploit this phenomenon in a variety of fields – including **Frequency Medicine** (also known as Bio-resonance/Energy Medicine). This of course paved the way to a natural, non-invasive, non-artificial, *alternative* approach to good health.

You may well ask how this is possible. The answer is simply based on 1 fundamental fact: every single object radiates its own **RESONANT FREQUENCY** – the unique frequency *at which that object vibrates*. The frequencies at which viruses/bacteria etc. can be killed were mathematically determined many decades ago. This means medical disorders can be treated by pulsing specific frequencies (sound waves) into the body, thus destroying microbes and other pathogens – even tumours, benign or malignant.

Consequently, there is now much more hope for healing in a world where viruses/bacteria are mutating so rapidly that science can't keep up with developing new antibiotics. The extensive range of conditions and diseases treated successfully with sound waves the world over, includes emotional issues, i.e. depression, anxiety, ADHD and many others. An inseparable bond exists between body and mind – the one always influences the other. Frequency Therapy can treat both terrains...with no medication, no bodily invasion.

Early detection and treatment of prostate cancer is possible with our 3D-NLS

Can this type of therapy treat cancer? The answer is YES! Globally, frequencies have proven extremely effective in the fight against cancer. The secret? Frequencies are able to **kill the stem cell** of a cancer cell: no radiation, no chemicals, no scars, no hair loss, and no side-effects at all! (Naturally, this does NOT preclude life-saving surgery when necessary). In fact, many health professionals and scientists are growing excited about the seemingly inexhaustible ways sound waves are enhancing human (and animal) health!

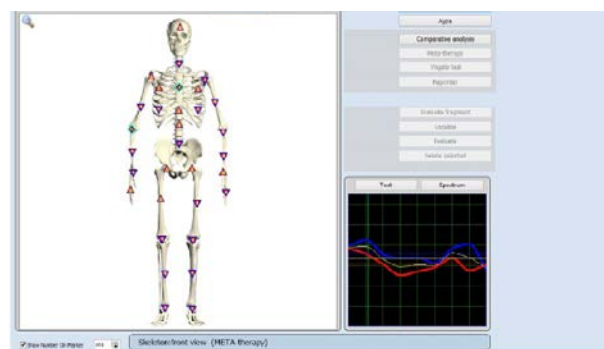

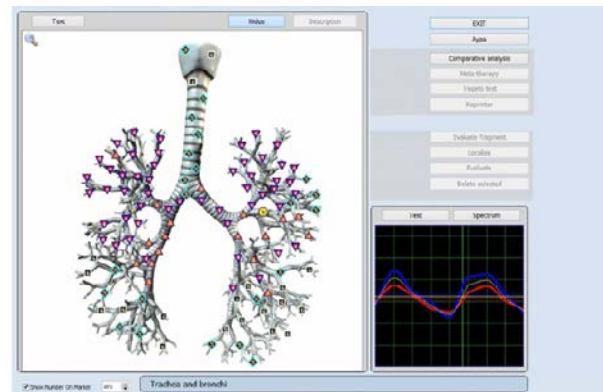

Charl demonstrating how to be scanned in the most tranquil manner!

Example: Heading an article by Robert Mc Kie, Science Editor at “The Guardian”, 31 October 2015: **“High power sound waves used to blast cancer cells” confirms that the medical field is starting to appreciate this astounding source of healing. This is just 1 of countless similar findings all over the world.”**

The Good News!

SOUNDWAVES HEALTH CLINIC, the popular health spot on Gordon's Bay beach-front, utilizes a variety of the most advanced elements of Frequency Therapy. Here, you may enjoy the benefit of having your body not only scanned, but also *treated* with truly front-line technology – in 1 location.

Our “Foundational Scan” reads your complete skeletal system, nervous system, vascular system – in short, **every system** including eyes, skin, etc. Once the **source** of your disorder has been pinpointed, we can deal with it – painlessly, with no artificial means, and no discomfort.

This has generated such tremendous enthusiasm that people can't stop referring friends and family to us.

A further *great* benefit: our scan includes your “**pap smear**”, “**mammogram**”, or **prostate check**, at the same time. ALL done with frequencies, with NO invasion of your body! **Early detection** is crucial for successful treatment, especially in the case of a life-threatening disease or tumour.

Depending on the outcome of a scan, our treatment may even include a highly successful combination of **Low Level (Cold) Laser Therapy** and **Millimetre Waves**.

Anne-Marie de Villiers is always ready to assist you

We believe a visit to our cosy, cheery consulting rooms in picturesque Old Cape Mall most certainly will revitalize you – in more ways than just one!

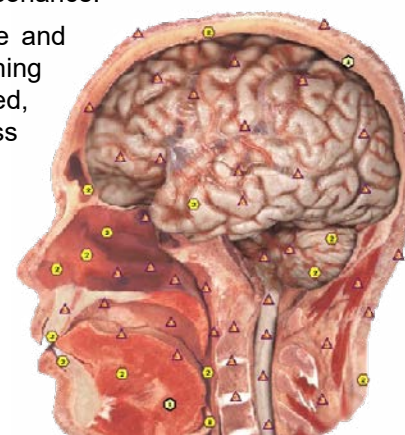

Getting to know the Therapist

Charl de Villiers, distinguished Therapist in Bio-resonance Medicine, has a proven track record in this field ranging over the past 2 decades. What started out as a hobby many years ago became a full-blown passion. Charl keeps abreast of new developments by continual research, and is steadily working his way toward his Doctorate in Energy Medicine and Bio- Resonance.

Sharing his vision and enthusiasm, his wife and partner **Anne-Marie** sees to the smooth running of their daily schedule. They feel truly blessed, being able to offer genuine hope to countless people.

“You need *sound* information to make *sound* choices!”
