

THE NEW AGE OF UNDERSTANDING DIGITAL IMAGING FOR YOUR HEALTH

SoundWaves Health Clinic in picturesque Old Cape Mall in Gordon's Bay, has through the years proven **Frequency Therapy** as a highly scientific system of treatment without medication. Our amazing **Non Linear System** offers you this 3-fold benefit: 1) Scan 2) Analysis 3) Treatment. No chemicals; non-invasive; and NO side effects!

Wouldn't you like to have early warning that there is a growth in your body – when it's still the size of a pinhead? Wouldn't you just love to get rid of it - without any bodily invasion? How about a prostate check; a mammogram; a "pap smear" – without being touched at all?

What about your child struggling with allergies, ADHD etc. - Don't you just wish you could discover the cause – and improve the child's health without medication?

Well, we have the solution! Whereas conventional medicine focuses on symptoms, our system can identify and eliminate the origin of a disease/condition – thus eliminating those very symptoms.

In fact: we also scan the DNA/RNA; chromosomes; genes; cell walls; cell nucleus; even the mitochondria! Scientific studies, medical records and video footage¹ substantiate that frequencies (sound waves) do in fact destroy bacteria, viruses, parasites - even tumours - without endangering any part of the body.

Furthermore: Frequencies are globally acclaimed and proven as one of the best ways of winning the war against cancer. ²

¹YouTube: Search for "Killing with frequencies" and watch numerous fascinating demonstrations.

Something completely different

Most of you know that, for several years now, we have scanned and treated people all over the world without their physical presence. (The earlier DNA sample /nail clippings method – see our website article "Remote Treatment").

The surprisingly swift world-wide pandemic lockdowns of 2020 quickly shook everybody out of their comfort zones. Globally, people were faced with unexpected challenges to former ways of thinking - and working!

And so, for us at SoundWaves Health Clinic, this brought about the most recent addition to our natural health care arsenal:

Digital Imaging

Without sounding too technical, this process boils down to a few basics:

A digital image is a *digitally encoded* representation of an object's visual characteristics (i.e. facial features). Such a digital photo can be copied repeatedly **without losing any image quality**.

Using a digital camera or smartphone for a facial photo, *light** zooms into the camera lens from the face. This incoming *light** hits the inner sensor chip, breaking it up into millions of pixels. (Pixels are the multitude of minute square picture elements forming the image.)

The sensor measures the colour and brightness of each pixel, storing it as a number which is then reproduced as a photo. The combination of these pixels is *unique to that person's face*.

*[*Light = energy/vibrations/frequencies. Bearing in mind that all created things have their own unique frequencies, it means that each face consists of its own unique frequencies, captured digitally in the form of a combination of pixels – your unique combination of pixels/frequencies.]*

So, to scan or treat you in your absence we insert your digital photo into our specialized system - fondly called "The Black Box".

Your photo pixels are instantly transformed into *scalar waves*. At 1 and a half times the speed of light, these scalar waves capture that image and transmit it into space to find the corresponding source (i.e. you). The very moment that occurs, the connection between you and the machine is established – enabling us to scan or treat you wherever you are. Nothing can block scalar waves!

A simplified way of picturing this process: (courtesy of Tutorialspoint)

What a bonus: we do all the work, while you are free to continue your daily activities without interruption - whether working, relaxing, exercising, watching a movie etc. What's more: it saves you time and money!

We have been serving people "remotely" not only in South Africa and cross-border, but also in Australia, Belgium, Dubai, England, Germany, Malta, Namibia, Netherlands, Reunion, Scotland, United States of America – and this list is still expanding!

Simply send us your digital photo - from your smartphone to ours!

Charl de Villiers demonstrating scan and treatment

Who are we?

Charl de Villiers, distinguished Therapist in Bio-Resonance Medicine, has a proven track record in this field ranging over the past 2 decades. He keeps abreast of new developments by continual research, while working toward his Doctorate in Energy Medicine and Bio-Resonance.

Anne-Marie de Villiers: As his wife and business partner, I love sharing his passion and vision: to help people enjoy good health!

Discover more on our website about who we are; the extensive range of services we offer; but most of all: what we can do for you. Be prepared to have your mindset challenged in a positive way!

Anne-Marie de Villiers
Always ready to assist you

**SoundWaves Health Clinic: Suite 6, Old Cape Mall,
33 Beach Rd, Gordon's Bay**
